

Workshop

Electrochemistry and Raman Spectroscopy

You are invited

Electrochemistry and Raman Spectroscopy workshop for teaching, research and in-field applications.

Portable potentiostats: The world of electrochemistry in your hands.

Metrohm Australia invites you to a workshop where Metrohm's portable potentiostats and the Metrohm Instant Raman Analyzers (Mira) will be shown.

The Metrohm portable potentiostats combine electrochemical research in the laboratory with on-site research using well-established electrochemical techniques.

These small and affordable portable instruments enable you to develop applications for your specific research needs. Also discover how you can boost your research with screen-printed electrodes: they allow you to perform a large number of experiments with low volumes of reactive or sample and without electrode pretreatment or maintenance. They are fast, inexpensive, reliable and versatile.

Handheld Raman spectrometers: Instant material identification and verification

Metrohm's Mira systems are robust and reliable portable spectrometers for material identification and verification.

Metrohm's portable line instruments are an ideal solution in many areas, such as teaching, research and in-field applications.

Equipment

- Metrohm Dropsens Portable Potentiostat
- Metrohm Handheld Raman Spectrometer

Instructors

- Dr Sivanesan Arumugam, Metrohm Electrochemistry & Spectroscopy Product Manager, Australia and New Zealand
- Steven Tsalamandris, Metrohm Territory Manager, Victoria

19 April 2018

Melbourne Venue
Metrohm Australia (VIC)

17/25 Cook Road
Mitcham, VIC 3132
Australia
Tel (+61) 03 8872 7000

Programme

- 08:30am - Registration
- 09:00am - Theory & practicals on the applications of portable potentiostat and screen-printed electrodes.
- 10:45am - Morning Tea
- 11:00am - Theory & practicals on hand-held Raman Spectrometer and its applications
- 12:30pm - Conclusion
- 12:45pm - Complimentary lunch
- 01:45pm - End

Registration

Register online: mep.metrohm.com.au/mep-events/
