successful sample preparation for ICP-MS analysis as well as AA/ICP-
OES. ([ethos-easy-main-409c0aed.jpeg](#))

Microwave Green Extraction of Natural Products: Understand and
overcome the difficulties of sample preparation for successful GC and
HPLC Analyses. ([ethos-natural-products-118c8490.jpeg](#))

Gladesville NSW, November 2018: Metrohm Australia and Milestone S.r.l. (Italy) are pleased to announce their new exclusive partnership in Australia.

Starting November 1, 2018, Metrohm Australia (formerly known as MEP Instruments) will be supplying and supporting Australian laboratories with Milestone's state-of-the-art microwave technology.

Milestone is an experienced and renowned manufacturer of advanced laboratory instruments such as microwave digestion, synthesis, extraction and ashing devices. The Milestone portfolio also features direct mercury analysers requiring no sample preparation, delivering results in as little as 6 minutes per sample. Milestone's Clean Chemistry Line offers an innovative and complete portfolio of systems and accessories for analytical blank control and reduction in ultra-trace elemental analysis.

"We are proudly committed to our scientific community in Australia, says Andy Matthews, Metrohm Australia's CEO, to provide the same excellence in quality and support to our Milestone customers as all our Metrohm clients have been enjoying over the past 20 years."

The instruments cover a wide range of applications, i.e. trace metal analysis; solid, liquid and gas samples preparation; environmental, food and natural products.

Milestone Solutions are available in Australia exclusively at Metrohm Australia.
