Karl Fischer Workshop

You are invited

Are you getting the most out of your Metrohm Karl Fischer?

Karl Fischer titration is one of the world's most frequently applied laboratory methods.

A titer determination or a sample analysis can be quite tricky sometimes. You may encounter results which are not reproducible or a drift value that is constantly too high and not as stable as you expect it to be.

Course Description

1 day training course: 08:30am to 03:30pm

This course is designed for the everyday Metrohm Karl Fischer Titration user.

Outcome

By the end of the course, participants will have working knowledge of the following:

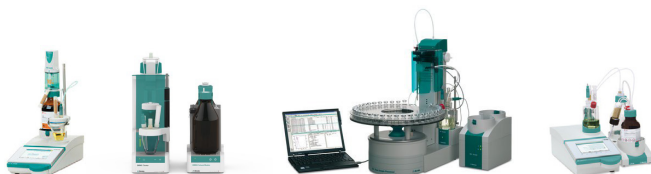

- How to reach a low and stable drift value
- The steps of cleaning and maintenance of electrodes
- How to dissolve samples completely
- How to run and evaluate a temperature gradient
- The tricks to avoid over titration

Workshop Coordinators:

- Penny Lewis, Senior Western Australia Territory Manager
- Lavanya Avadiar, Western Australia Territory Manager
- Shreeram Anturkar, Western Australia Product Support Specialist
- Isaac Rogers, Metrohm Australia/New Zealand Ion Chromatography Product Specialist
- Luis Puyo, Metrohm Australia/New Zealand Titration Product Manager

Equipment:

- Metrohm 915 KF Ti-Touch
- Metrohm OMNIS KF System
- Metrohm 874 USB Oven Sample Processor with 851 Titrand
- Metrohm 917 Coulometer

Technology Park Function Centre

2 Brodie Hall Drive
Bentley, Western Australia, 6102

Programme

- 08:30am - Registration
- 09:00am - Welcome and Introduction
- 09:10am - Theory 1: Basics of Karl Fischer Titration
- 10:30am - Morning Tea
- 11:00am - Theory 2: Practical Tips for the daily Karl Fischer work
- 12:15pm - Complimentary Lunch
- 01:00pm - Karl Fischer Workstations
- 03:00pm - Final Discussion/Questions

Registration

Register online: mep.metrohm.com.au/mep-events/

For further information or enquiries
feel free to contact **Paula Britz**: (+61) 02 8899 5222
